

Assessment and rehabilitation **Fen House**

Brainkind Fen House is a neurological centre in Ely, East Anglia providing innovative rehabilitation and person-centred support to enable people to thrive after a brain injury. We ensure that the people we support live as independently as possible in an environment that enhances their wellbeing.

About Brainkind Fen House

Brainkind Fen House is a specialist neurological centre where people with acquired brain injuries or complex neurological conditions come for an initial 12-week assessment to begin their rehabilitation. This can be extended to provide for further support, as required.

Our specialist rehabilitation is based on a neuro-behavioural approach. We focus on enabling people to function more independently and develop their lives as they choose. Our programmes include educational and therapeutic sessions; support for personal, social, and domestic skills; guided leisure time; vocational support and training; behavioural management; and access to the local community.

Brainkind Fen House, rated 'Good' by the CQC, is equipped with a wide range of facilities to help support the delivery of our expert care. Our multi-disciplinary team has access to specialist therapy rooms, a skills rehabilitation kitchen, and a large, landscaped private garden to aid the people we support in their rehabilitation and recovery.

The people we support are actively involved in reviewing their progress. We promote the active involvement of families in the rehabilitation process, and home leave is encouraged wherever possible.

Whether someone needs assistance with daily tasks, help to improve emotional or social skills, or support to regain their physical independence, our services ensure that life after a brain injury is a life well lived – whatever that means to the people we support.

Becoming more independent

Access to the wider community is integral to rehabilitation. Brainkind Fen House is close to local shops and leisure facilities with easy access to Cambridge – offering opportunities for education, training, and employment – making it ideal for social integration for those on a long-term supportive pathway.

More support

Brainkind Fen House has a one-bedroom transitional supported living flat within the grounds where the people we support can strengthen their skills before moving on to a more independent environment.

Conditions we specialise in

We provide support for and specialise in the rehabilitation of people with brain injuries and neurological conditions who are experiencing one or more of the following:

- Cognitive problems including thinking, memory, problem-solving, learning, awareness, and perception
- Communication impairments requiring intensive SaLT, including modified diet rehabilitation
- Physical impairments that affect mobility, posture, or dexterity
- Minor physical and verbal aggression
- Disinhibited and / or impulsive behaviour

This is not an exhaustive list.

We welcome all enquiries and consider each on a case-by-case basis.

Service overview and facilities

- Twenty-four comfortable ensuite bedrooms.
- Two specially equipped skills rehabilitation kitchens where the people we support can regain daily living skills in a supported and safe learning environment.
- Two large, comfortable communal lounges and a specialist activity room.
- Dedicated therapy rooms.
- A large landscaped private garden.
